

[UMA FA26] Events Individual Interview Round

Behavioral (10 min)

- Tell me about yourself (ex: name, major, hobbies, interest in events): 1 min
- Tell me about an event you helped plan or host (doesn't have to be marketing-related, could be something as simple as a dinner). What made it successful, and what was your role in making that happen?: 2 mins
- What's a marketing event or campaign that's stuck with you personally and why? (could be positive/negative) 2 mins
- Considering yesterday's social round, what motivates you to be part of UMA beyond your professional goals? 1 min
- Tell us about a time you had to learn something new to complete a task 1 min
- Teach us something in 1 minute. (1 min to brainstorm, 1 min to teach) 2 min

Warm Up Case (3 mins to answer)

A campus boba shop is launching a limited-edition drink and wants buzz before it launches. You're asked to feature it in an unconventional, high-traffic spot to catch students' attention. What kind of location would you look for (examples include: time of day, foot traffic pattern, what students are doing there), and why would that generate the most excitement and curiosity?

3-Part Case "StudySync": Productivity and Study App (2 min read)

Task 1: Trend & Competitor Research (4 mins to brainstorm, 2 to present):

- What would you research to understand what makes something go viral or "stop traffic" among college students right now? This could include looking at specific companies, apps, or campus activations.
- What would you actually take from that research to apply here?

Task 2: The Activation (4 mins to brainstorm, 2 to present):

- Now that you've done your research, design the activation! Create something that attracts students' attention - what makes someone stop, and why would they want to share it? Then walk us through the event. This could include where and when it takes place, what's actually happening, and potential partnerships. Remember, the goal is brand awareness and promoting StudySync's AI feature.

Undergraduate Marketing Association Fall 2026

Task 3: Post Event (4 mins to brainstorm, 2 to present)

- You've designed the activation, and StudySync wants to know if it actually drove awareness of the AI feature. What data or signals would tell you that?
- You've determined from this that this event was a success at UC Berkeley. StudySync recreates this exactly at a different university, and it is not as effective. Ideate reasons why this activation could have flopped and how would you have prevented this?

Thank them for their time and let them know next steps.
